A brochure for SAGE Project Management. The top left features the SAGE logo and the text 'PROJECT MANAGEMENT'. To the right, it says 'ASK OUR EXPERTS' and 'Mission Statement'. The main body of the brochure contains text describing their services: 'To bring innovation and provide the most customer-centric Project Management services for clients looking for proven expertise in a small company.' It also mentions 'Having spent nearly 10 years in the Construction Management field with large international and mid-level firms, my experience showed the demand for a more customized professional service improving short time management and job performance. Sage Project Management offers Owner's Representative services during PRE-CONSTRUCTION, CONSTRUCTION, and POST-CONSTRUCTION. Project specific scope can be customized for individual clients to best fit the needs of your organization.' The background of the brochure shows a collage of images related to construction and project management, including a person in a hard hat looking at plans, a person working at a computer, and various construction equipment.

PRE-CONSTRUCTION	CONSTRUCTION	POST-CONSTRUCTION
SAGE Project Management will work with your team to define your vision and the steps needed to create that vision.	Our team will support the processes to build your vision and keep you informed every step of the way.	SAGE Project Management will review outcomes to ensure that each important part of your vision is brought to life.

Mission Statement

To bring innovation and provide the most customer-centric Project Management services for clients looking for project experience in a small company.

Having spent nearly 10 years in the Construction Management field with large international and mid-level firms, my experience showed the demand for a more customized professional service improving client time management and job performance. Sage Project Management offers Owner's Representative services during **PRE-CONSTRUCTION, CONSTRUCTION, and POST-CONSTRUCTION**. Project specific scope can be customized for individual clients to best fit the needs of your organization.

PRE-CONSTRUCTION
SAGE Project Management will work with your team to define your vision and the steps needed to create that vision.

CONSTRUCTION
Our team will support the processes to build your vision and keep you informed every step of the way.

POST-CONSTRUCTION
SAGE Project Management will review outcomes to ensure that each important part of your vision is brought to life.
